EXAMINER'S AMENDMENT

1. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.

2. The Amendment filed on June 26, 2007 has been amended as follows:

(a) in Claim 14, line 7, the term "determining determines" has been changed to --determining step determines--

Allowable Subject Matter

3. Claims 9-12, 14-17, 19-22 and 24-26 are allowable over prior art.

4. The following is an Examiner's statement of reasons for the indication of allowable subject matter based on Applicant's Amendment filed on June 26, 2007:

As in claim 9, the prior art of record fails to teach or fairly suggest a recording apparatus having the following features:

(a) a control circuit configured to search an information data related to the digital audio data in an internal memory to determine if a digital audio data has been stored in the internal memory, if the control circuit determines that the digital audio data has been stored in the internal memory, the control circuit prohibits writing the digital audio data into the internal memory, and if the control circuit determines that the digital audio information data are not stored in the internal memory, the control circuit writes the digital audio data from the standard compact disc to the internal memory; and

(b) a data compression and encoder circuit configured to compress the digital audio data from a compact disc before the digital audio data is written to the internal memory.

As in claims 14 and 19, the prior art of record fails to teach or fairly suggest a method for recording digital audio data having the following steps:

(a) searching information data related to the digital audio data in an internal memory; determining if the digital audio data is already stored in the internal memory;

(b) prohibiting writing the digital audio data into the internal memory if the determining determines that the digital audio information data is already stored in the internal memory; and

(c) compressing the digital audio data to form compressed

digital audio data if the determining determines that the digital audio data is not already stored in the internal memory; and writing the compressed digital audio data from the standard compact disc to the internal memory if the determining determines that the information data is not already stored in the internal memory.

The features indicated above, in combination with the other elements of the claims, are not anticipated by, nor made obvious over, the prior art of record.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Related Prior Art

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kori et al. (6,781,935) is pertinent because Kori teaches a copy history information management memory in an audio recorder.

Yoneda (6,983,314) is pertinent because Yoneda teaches an audio download recording system.

5. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Kim CHU whose telephone number is (571) 272-7585 between 9:30 am to 6:00 pm, Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrea Wellington, can be reached on (571) 272-4483.
